Re: Wheeling Avenue Reconstruction

Dear Current Property Owner,

By now you are most likely aware that the reconstruction of the Wheeling Avenue from Centennial Avenue to McGalliard Road has begun. The entire project will include the complete reconstruction of the roadway with widening in some areas. The future Wheeling Avenue will include a new storm sewer and drainage system, curb and gutter, and a 6' sidewalk on both sides of the road.

Throughout the construction process, E&B Paving Contractors and I will strive to ensure that you have adequate access to your business or residence at all times. The current traffic configuration allows vehicles to utilize the east half of Wheeling Avenue while the west half is constructed. By late spring, we will switch this configuration and allow traffic to utilize the newly constructed west half of Wheeling Avenue while we construct the east half of the roadway. This should result in a consistent traffic flow throughout the construction process. However, disruptions to the traffic flow may be encountered with the delivery of materials and equipment throughout construction. We assure you that these disruptions will be brief and kept to a minimum in order to limit your inconvenience.

It is our goal to complete this project in a quick and efficient manner. We anticipate completing most of the construction and opening the roadway by late November of 2020. Minor items such as seed placement will be completed in the spring of 2021. Please bear with us for a short time and you will soon enjoy a beautiful thoroughfare in a few short months.

If you have any questions or concerns regarding the construction near your property, please feel free to call me directly at **317-519-0937**.

Sincerely,

Amber L. Tolle, P.E.
